

Experiment-4

Student Name: Sujit Kumar Sahoo

UID:20BCS9626

Branch: CSE

Section/Group: 608/A

Semester: 6th

Subject Name: MAD Lab

Subject Code: 20CSP356

Aim

Click on activity and open many intents.

Objective

Create an application having three components which changes view to different intents by clicking on them.

Theory

Android Intent is the message that is passed between components such as activities, content providers, broadcast receivers, services etc.

It is generally used with `startActivity()` method to invoke activity, broadcast receivers etc.

The dictionary meaning of intent is *intention or purpose*. So, it can be described as the intention to do action.

The `LabeledIntent` is the subclass of `android.content.Intent` class.

Intents facilitate communication between different components in several ways.

The intent is used to launch an activity, start the services, broadcast receivers, display a web page, dial a phone call, send messages from one activity to another activity, and so on.

There are two intents available in android as Implicit Intents and Explicit Intents.

Code

MainActivity.kt

```
package com.example.intents

import android.content.Intent
import android.net.Uri
import androidx.appcompat.app.AppCompatActivity
import android.os.Bundle
import android.provider.MediaStore
import android.widget.Button
import androidx.cardview.widget.CardView

class MainActivity : AppCompatActivity() {
    override fun onCreate(savedInstanceState: Bundle?) {
        {super.onCreate(savedInstanceState)}
        setContentView(R.layout.activity_main)

        val btnIntent = findViewById<Button>(R.id.button)
        btnIntent.setOnClickListener{
            //open new activity
            intent = Intent(applicationContext, SecondActivity::class.java)
            startActivity(intent)
        }

        val webButton = findViewById<CardView>(R.id.cardWeb)
        val cameraButton = findViewById<CardView>(R.id.cardCamera)

        webButton.setOnClickListener {
            val intent = Intent(Intent.ACTION_VIEW)
            intent.data =
Uri.parse("https://www.linkedin.com/in/adityanarayansharma/")
            startActivity(intent)
        }
        cameraButton.setOnClickListener {
            val intent = Intent(MediaStore.ACTION_IMAGE_CAPTURE)
            startActivity(intent)
        }
    }
}
```

SecondActivity.kt

```
package com.example.intents

import androidx.appcompat.app.AppCompatActivity
import android.os.Bundle
```

```
class SecondActivity : AppCompatActivity() {  
    override fun onCreate(savedInstanceState: Bundle?)  
    {  
        super.onCreate(savedInstanceState)  
        setContentView(R.layout.activity_second)  
    }  
}
```

ActivityMain.xml

```
<?xml version="1.0" encoding="utf-8"?>  
<LinearLayout xmlns:android="http://schemas.android.com/apk/res/android"  
    xmlns:app="http://schemas.android.com/apk/res-auto"  
    xmlns:tools="http://schemas.android.com/tools"  
    android:layout_width="match_parent"  
    android:layout_height="match_parent"  
    android:orientation="vertical"  
    tools:context=".MainActivity">  
  
    <Button  
        android:id="@+id/button"  
        android:layout_width="match_parent"  
        android:layout_height="wrap_content"  
        android:layout_gravity="center"  
        android:layout_margin="100dp"  
        android:text="Click Me!" />  
  
    <Button  
        android:id="@+id/button2"  
        android:layout_width="match_parent"  
        android:layout_height="wrap_content"  
        android:text="Button" />  
  
    <androidx.cardview.widget.CardView  
        android:id="@+id/cardWeb"  
        android:layout_width="250dp"  
        android:layout_height="150dp"  
        android:backgroundTint="@color/purple_200"  
        android:layout_gravity="center"  
        android:layout_margin="30dp"  
        app:cardCornerRadius="20dp">  
  
        <TextView  
            android:layout_width="wrap_content"  
            android:layout_height="wrap_content"  
            android:layout_gravity="center"  
            android:text="It's Website"  
            android:textStyle="bold"  
            android:textSize="25dp"  
        />  
  
    </androidx.cardview.widget.CardView>  
  
    <androidx.cardview.widget.CardView  
        android:id="@+id/cardCamera"
```

```

android:layout_width="250dp"
android:layout_height="150dp"
android:backgroundTint="@color/purple_200"
android:layout_gravity="center"
android:layout_margin="30dp"
app:cardCornerRadius="20dp">

```

```

<TextView
    android:layout_width="wrap_content"
    android:layout_height="wrap_content"
    android:layout_gravity="center"
    android:text="Camera"
    android:textStyle="bold"
    android:textSize="25dp"
/>

```

```

</androidx.cardview.widget.CardView>

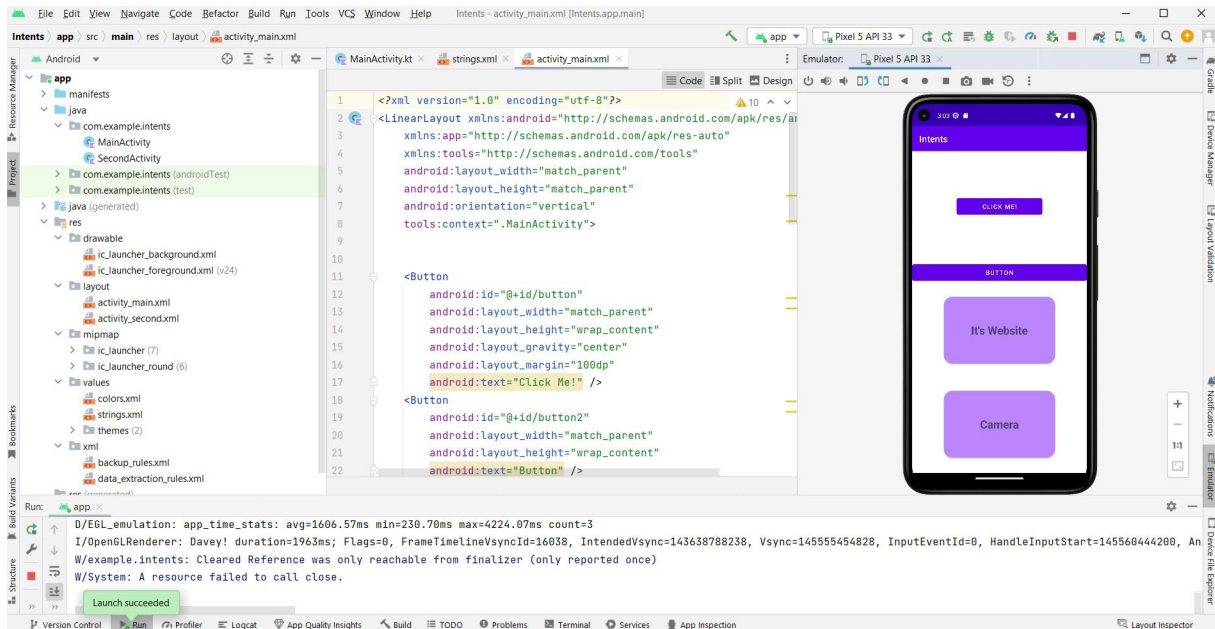

```

```

</LinearLayout>

```
